

Gynae Cancer Patients:

Are you suffering from hot flushes? Are they troublesome for you?

Come and try
Auricular
Acupuncture.

8 out of 10
people

say it helps with their
hot flushes

If you have had surgery or treatment for your gynae cancer, then call us for an appointment on **0114 226 5666**.

Auricular Acupuncture (or ear acupuncture) is a form of complementary therapy positioning very fine needles into the outer ear.

There is significant evidence to suggest that Auricular Acupuncture can reduce both the severity and frequency of hot flushes in many people.

Each acupuncture point being treated is said to trigger electrical impulses from the ear via the brain, to the specific part of the body. It is known to have a calming effect on the central nervous system.
